

RECEIVED

EIS000121

1 SEP 30 1999 MS. WILSON: My name is Mary Wilson. I'm a
2 member of the Pahrump Town Board and liaison to the Pahrump
3 Nuclear Waste Advisory Board.

4 Tonight I am speaking just as a private citizen.
5 The Pahrump Nuclear Waste Advisory Board will be studying the
6 EIS and making formal comments at a later date.

7 Earlier I asked why recycling was not being
8 considered. The answer I got was economics. I believe that
9 life, any life must take precedence over dollars.

1 10 Perhaps it's time to remove the nuclear waste
11 issue from the political arena and place it where it belongs,
12 the hands of scientists who have the knowledge to move forward.

13 I further believe that if a concentrated effort
14 were made, that a solution in safe reprocessing is possible.

15 Let us learn from this morning's tragedy in Japan
16 and put the effort into research that will result in safe
17 processing; not just for the United States, but also for the
18 entire planet.

19 Thank you.

20 MS. BOOTH: Thank you.
